

## JLG Attachments

JLG Attachments - In the late 1960's John L. Grove, with his wife Cora started out on a cross country voyage in their RV. Recently retired, after spending several years working with his brother to manufacture their crane company into an industry leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road trip.

Whilst on their journey, John spent time conversing with previous business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered an infinite marketplace for a product that could quickly and safely lift individuals in the air to accomplish upkeep and other building services.

After returning from their holiday, John set up a partnership with two of his friends and bought a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design essentials of that original lift into existing models.

JLG lift trucks have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the company proudly continues to expand itself into numerous markets worldwide and develops new products to make sure consumers are capable of being more efficient and perform in the workplace within a safer environment.
