

Forklift Electrical Parts

Forklift Electrical Parts - Lift trucks may be specifically marked to be used in hazardous places. A labeled truck indicates the design has met the minimum standards of ANSI/UL 558 for engine powered lift trucks or ANSI/UL 583 intended for electric lift trucks for the type of label attached.

The application for labels utilized for lift trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Areas or Use, Maintenance and Operation, and Type Designations. Ask your local insurance provider and Fire Marshall for more info on the approved uses of industrial powered trucks in your application.

If the particular lift truck satisfies the outlined standards, labels can be put. A labeled lift truck would show the type of designation located on the nameplate and would have a properly corresponding label attached.
