

Clark Forklift Part

Clark Forklift Parts - Currently, there are over 350,000 Clark lift trucks performing globally, and more than 250,000 operating in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, duel fuel, gas, LPG, hand powered trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, covers more than 120,000 specific components fabricated for 20 distinctive designs of lift trucks and automated equipment. Your regional Clark Seller is your complete source for availability of all your parts requirements supplied by Clark Totalift.

Clark's phenomenal Parts Distribution Centers are conveniently located in Louisville, Kentucky, which serves both their consumers and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to offer the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to enhancing output and benefiting performance.

Internationally, Clark has one of the most impressive supplier support networks. With over 550 locations worldwide, seller representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the material handling industry.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional commitment to safety is at this time a customary feature on every lift truck.

Clark's relentless mission to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift producer across the globe to be certified with the globally approved quality standard ISO 9001 for each and every one of their manufacturing facilities. Additionally, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any number of environmental limitations, thus placing them in a prevailing market position.

Clark has chosen the structure of "Lean Manufacturing" at all of its assembly facilities for the reason that this technique is particularly economical and enables minimal use of resources. Established to guarantee maximum proficiency, this system is intended to find and acknowledge the most effective ways for manufacturing plant management. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers communicate together to develop the proficiency and excellence of their products while minimizing expenses. The new value engineering agenda combines progressive product development and offers improved customer support and service within the industry.
